

Fun with maps!

1. Look at the map below. See if you can write out the name of each continent and each ocean.
2. Next, go online together and find out one interesting fact about each continent. Write it below the name of the continent.

3. If you already know the continents and oceans, try and pinpoint 5 different countries by drawing their flag where the countries are. You can look online together to find out what the flags look like.
